Subject: Potential Force Majeure Event for GECC Redundant HRSG Project
Attachments: GCO_Typhoon hit AFW Xinhui_Letter 8-24-17[1].pdf (43.35 KB)

Pursuant to Consent Decree Paragraph 100, I write to provide notice of a possible Force Majeure event regarding completion of the Redundant HRSG project at GECC. We learned yesterday that Typhoon Hato hit the facility in China where the redundant HRSG is being built, and that work at that facility has been suspended. Regarding the information required by Paragraph 100 to be provided within 7 days of the event, I note that the reason for the potential delay is the typhoon, as provided in the attached letter, and that the potential delay will not cause or contribute to an endangerment to the public health, welfare, or environment.

Regarding the additional information required by Paragraph 100 to be provided within 7 days of the event, we will update you shortly after we learn (a) the extent of the delay and whether it will impair our ability to complete installation of the redundant HRSG within the time provided in the Consent Decree, (b) whether there are any measures that can be taken to minimize the delay, and (c) if so, a schedule for such measures. We also will provide any additional documentation with that update. We hope that we will have this information within a week, but that may not be possible.

Rob
